ECHEVERIA dunbergii, another slow
grower, pretty flowers..... .35

ECHEVERIA tectorum, showy plant with
reddish leaves, 2"..... .20 2.00

ECHEVERIA elegans, dainty little blue plant .15 1.50

ECHEVERIA ackermanii, hybrid, fine large
rosettes, reddish, 2"—25c; parent plant
size, 4"..... .45 4.50

ECHEVERIA, several, names not known,
attractive plants, 5 and 10 cents each.

ECHINOPSIS multiplex, small plant, large
pink flowers, shade, moisture, 2"..... .20 2.00

EUPHORBIAS

EUPHORBIA lactea, striking deep three
angled leaves, 4"25 2.50

EUPHORBIA commelini, dwarf-like, grows 2" tall and 12" wide; 2" size.....	.35	3.50
EUPHORBIA splendens, Christ Thorn, coral flowers, large \$2.50; 3".....	.35	3.50
EUPHORBIA resinferas, low dense clusters	.25	2.50
EUPHORBIA submammillaria, deep green, round leaves, tiny green flowers, 3".....	.25	2.50
EUPHORBIAS, 40 other varieties, 40c to \$250.00, accord- ing to rarity of variety.		
GASTERIA hybrida, dainty dog-tongue- like leaves, small plants, 2"20	2.00

HAWORTHIA

HAWORTHIAS, fine little shade loving plants, ten varieties, no names.....	.20	2.00
HAWORTHIA tinuata, unusual snow white rings around leaves, 2".....	.45	4.50
HAW. margaritifera, (white-pearled Haw.) showy, 4"—\$1.00; 1".....	.50	
HAW. cymbiformis, green compact rosette, very neat and fine35	3.50
HAW, turgida, pretty small deep green plants. 1"—25c; others not named.....	.20	2.00
KALANCHOE pilosa, beautiful plant with brown tipped gray leaves, 2".....	.20	2.00
KALANCHOE fenschesii, showy little plant with oval leaves, 2".....	.15	1.50
KALANCHOE marmorata, #29 in picture, spotted or mottled leaves, 3".....	.20	2.00
PLEIOSPILOS bolussi, grows 2" tall, 6" wide, large yellow flowers.....	.35	
PLEIOSPILOS hybrid, (living rock), at- tractive flowers.....	.35	3.50
KLEINIA tomentosa, beautiful, felt-like silvery covering, 2".....	.30	3.00
KLEINIA pendula, shape of measuring worm, lasting red flowers, 3".....	.30	3.00
KLEINIA articulata, candle shaped, beau- tiful bluish leaves, 3".....	.15	1.50
KLEINIA repens, blue-white stems, round- ish leaves25	2.50

SEDUM

SEDUM are interesting little plants with a variety of forms and color. We have ten varieties, no name 5c, named variety 10.

SEDUM guatemalense, red, 1" to 3" size	.10	1.00
SEDUM pachyphyllum, grayish-green, club- shaped leaves, 1" to 3" size.....	.10	1.00
SEDUM winkeleri, 5c; S. congromeratum, 5c; S. multiceps, dark green.....	.20	2.00

SEMPERVIVUM

SEMPERVIVUM are miniature plants similar to Echeverias in some ways. They are distinguished by their half inch star-shaped flowers on 3" upright stems. Twenty varieties.

SEMPERVIVUM calcarem, pretty grey leaves, red tips10	1.00
SEM. globulariform, half-inch round, red....	.05	.50
SEM. brownii, red, 1"—5c; S. atlantica, spider web-like tufts.....	.10	1.00
SEM. cristalinum, fine plant, 1"—15c; S. tectorum, red, 2".....	.15	1.50
SEM. arachnoideum, rosettes covered with web-like tufts, 1/2" up.....	.10	1.00

STYLOPHYLLUM candida, choice little plant, branches low, rounded leaves covered with snow white powder, 2"; cuttings—15c; rooted35	3.50
STYLOPHYLLUM plants not named, cuttings 10c; rooted plants, 2".....	.25	2.50

STAPELIAS

STAPELIAS need plenty of heat and much water at blooming time.

STAPELIA, crested variety.....	.45	4.50
STAPELIA variegata, odd starfish-like flowers, cuttings 10c; rooted.....	.15	1.50
STAPELIA comparabilis, pretty flowers, purple and large 3" plants.....	.45	4.50
STAPELIA, unnamed, dainty little purple star-shaped flower, 1" cutting.....	.20	2.00
STAPELIA, new one with fine 4" star-shaped flower, 2" size plant.....	1.00	10.00
STAPELIA gigantea, 10" flowers, 2" cuttings—10c; rooted25	2.50

State Tax at 3% to be added to all prices

LEGEND

The following abbreviations are used: C for cuttings not rooted, R for rooted plants, S for seedlings, 3" for three inches, 3' for three feet.

CUTTINGS are estimated at half the price of rooted plants when available. However, no single cutting is sold for less than five cents.

GRADING—When a dwarf plant is as broad or broader than tall, it is graded by width.

GENERAL CATALOGUE

A forty-eight page catalogue containing many fine novelties will be sent upon receipt of 25c in stamps. This can be deducted from the first retail purchase of \$2.00 or over.

CAMELLIA LIST

This list of the world's finest Camellias will be mailed upon receipt of stamped addressed envelope.

Among our outstanding plants are varieties copyrighted and patented by us. Two new fragrant plants patented by us and not yet listed are offered for advance booking of orders, 6" plants \$50.00 each.

CACTUS AND SUCCULENTS

Plants designated by the name CACTUS or CACTI constitute the family CACTACEAE. No other group in the entire vegetable kingdom is more remarkable for its strange and varied forms, the beauty of its flowers and singular adaptation to desert conditions. Cactus are not however confined to the desert but flourish in the moist tropical forests of the New World where they have developed interesting forms often epiphytal, trailing or scrambling in growth. Their flowers vary in hue and form and have in some cases delicious edible fruits. CACTACEAE have still a wider distribution than the desert, tropics or semi-tropics, they extend into Kansas, Colorado, Dakota and Canada.

CULTURE

Keep in mind that Cactus are 90% water. We find they thrive in soil which is not too moist. More Cactus are lost from over watering than from any other cause. Although some cactus grow better in heavy soils, others prefer soils of lighter texture. A general soil mixture

which we use with success for medium sized plants is three quarters sandy silt and one quarter leaf mold run through a quarter inch screen. For very small plants use a one-eighth inch screen; larger screens may be used for large plants. Be sure to use *fresh water silt* not salt water sand. Add a handful of old, old-fashioned lime mortar to about each gallon of soil mixture. We prefer potting in dry soil, waiting two weeks to even three months before watering. There is no set rule. When lack of water causes a shrinking of the plant, then we start watering. Many people ask how much water should be given a two inch pot. We suggest a tablespoon full of water twice a week. Larger plants may be watered in proportion. Cactus rot readily in pots without drainage since the surplus water stands in the bottom of the pot. Use pots with drain holes, placing them on saucers. We stop watering most of our cactus about October first. Except for extra small pots they do not receive water until February. This practice allows the cactus to dry up sufficiently to become more frost resistant.

POTTING—Never over pot plants of any kind. It is preferable to select a pot which will tend to crowd the plant roots rather than a large pot, since excessive soil in a pot tends to become sour and stale causing plants to rot before growing new roots. Always cut off bruised or broken roots.

RE-POTTING—In changing pots after the plants have grown one year or more, we prefer to change to just one size larger (as 3" pot to 4" pot). We often use the same pot, simply supplying fresh soil. This is especially true of slow growing varieties. After repotting we usually do not water for two or three months. Some of our slow growing plants growing in 4" pots we repot in June in the same pots.

FERTILIZING—We never fertilize newly potted plants. We establish for six to twelve months and about June add approximately one teaspoonfull of blood meal to a gallon of soil, or small handful to five gallons of soil; or use a bushel of cow manure to one barrel of water and let stand 3 days; then use liquid sparingly twice a year.

VARIETIES offered are the finest and most popular of their species. We can also offer special varieties not listed if you specify the variety you want. Varieties that we have on hand in small quantities we do not list. In writing for special sizes and prices please mention sizes wanted. This saves unnecessary correspondence.

SPECIAL INFORMATION wanted and not mentioned here will be given to the best of our ability on receipt of a self addressed stamped envelope.

TERMS—Cash with order. No C. O. D. accepted since this method of shipping involves more expenses with a subsequent raise in price of our plants to you.

STERILIZING of soil. We use 1 pint of formaldehyde to 15 gallons of water. Soak soil mixture thoroughly, then air and stir it several times over a period of 4 weeks before using.

PRICES

Please note our prices are for single plants and for a dozen instead of for ten. This gives you two extra plants for the price of ten. Where the dozen price is not given, simply multiply the single plant price by ten to get the dozen price. Thus if the single plant price is five cents, the dozen price would be fifty cents, not sixty cents. You receive two plants free. Where only the hundred price is given, the dozen rate may be estimated at one sixth the hundred rate.

POTTERY

We have a fine assortment of pottery both plain (not painted) and painted or glazed. We only handle pottery

made in the United States as we believe our own factories need this business. Hand-made pottery priced at 5, 15, 20, 25, 35 and 45 cents; hearts \$1.50; strawberry jars \$4.50 and up. Small pottery—shoes, slippers, canoes, elephants not planted priced at 20 cents, planted 35 cents. Scotties priced at 35 cents. Larger pottery—booties, elephants and deer priced at 45 to 60 cents not planted, planted 75 cents to \$1.00. Glazed flower pots priced from 25 cents to \$12.00 according to size.

Genuine pottery dinner sets of beautiful, assorted colors. Minimum sets of twenty pieces priced at \$3.95 and up.

CACTUS SEED Assortment priced according to quantity: 25, 50, 75 cents and \$1.00 per packet.

CACTUS BOWLS MADE UP

We specialize in making up any size or priced bowl to suit individual taste and purse. We have dainty Cinderella glazed slippers planted for 45 cents. From 45 cents the price ranges up to 75 cents, \$1.50, \$2.50, \$4.50 and up, according to rarity and size of plants. It is not difficult to plant \$50.00 worth of *Rare Plants* in a bowl less than a foot long. When ordering a bowl be sure to state whether you wish it colored or in the natural color.

HERB GARDEN

Twelve Assorted Varieties, 3"—6" plants. Price: 35c each, 3 for \$1.00 or a full dozen for \$3.00—Postage Extra.

SUBSTITUTION

We substitute with your permission a similar or better variety when an item ordered is out of stock. This is not a complete list as our stock changes from time to time.

SPECIMENS

As it is difficult to list every plant of some 20,000 cactus and succulents in our nursery, please write, stating variety and size, should you wish any large or unusual specimen.

DISCOUNTS

A discount of 5% is allowed on orders of ten dollars or over; 10% on orders of twenty-five dollars or over; and 15% on orders of fifty dollars or over when figured at the single or dozen rate. *THESE DISCOUNTS DO NOT APPLY TO SPECIAL ASSORTMENTS OR POTTERY.*

CLUB ORDERS

See discounts above.

DEALERS

As we do not put out a strictly wholesale list, dealers and agents may write to us for special prices specifying what they want and quantity of each variety.

MINIMUM ORDER

Minimum order for potted plants is \$2.00, for plants not potted, \$1.50. When you order potted plants we suggest you order them removed from pots and packed separately. This gives better protection to both pot and plant. The more elaborately planted bowls, costing \$3.00 and up, can be especially packed and shipped with safety by express. However we are not responsible for damage in transit and all packages should be examined upon arrival. Any damage should be reported to carrier immediately.

SAMPLES

Sample orders may be placed for \$1.50 and up. Add postage. Usually 10% of value of order will cover postage on smaller plants.

REMITTANCE

Please remit by postal money order, or bank draft or certified check. Postage stamps, 1½ or 3c only, are accepted up to five dollars.

CANADA and OTHER COUNTRIES

We are experienced in shipping to countries outside the United States. *Please secure where necessary your special government import number or label.* Be sure to make money orders or drafts payable in U. S. Dollars to facilitate exchange.

OUR HOBBY

When we have time for our hobby, it is collecting Indian arrow-heads, spears, old guns and antiques of the North American continent. What have you to sell or exchange. Only genuine specimens wanted.

NON-WARRANTY

We exercise due care in selecting our seed, bulbs, flowering and ornamental plants, berry plants, fruit and shade trees, and all other merchandise, but we give no warranty, expressed or implied, as to description, quality, productiveness, of any other matter on any merchandise we sell, and we cannot be responsible in any way for the crop or results.

If the purchaser does not accept the goods on these terms, they are at once to be returned.

INFORMATION

For further and more complete information send for the books listed below. You cannot afford to be without them.

BOOKS

CACTUS FOR THE AMATEUR contains 150 illustrations—100 plants in color; paper cover, postpaid \$1.25; board cover, postpaid \$1.75.

SUCCULENTS FOR THE AMATEUR contains 400 illustrations—70 in color; paper cover, postpaid \$1.75; board cover, postpaid \$2.25.

TREASURE ISLAND BEAUTIES

All of you who visited the Golden Gate International Exposition on Treasure Island will remember the large beds of beautiful yellow, orange, red, purple and rose MISEMBRYANTHEMUM flowers. We can now furnish you these bright flowered plants in nice blooming sizes, 3" to 6", for 25c each or \$2.50 per dozen. We will give you an assortment of 3 varieties—mention color you prefer and also a second choice in case we are out of stock of your first selection. Should you leave selection to us, we will send as many varieties as possible—possibly more than if you should select them yourself.
